

### REMARKS

In response to Examiner rejection of claims 1-2, 4-11, 13 and 15-20 under 35.U.S.C.102e as being anticipated by Cramer et al (US 2003/0230443 A1); claims 3 and 14 under 35.U.S.C.103a as being unpatentable over Cramer et al; and claim 12 under 35.U.S.C.102e as anticipated by Cramer et al, or alternatively under 35.U.S.C.103a as being obvious over Cramer et al., Applicant amends independent claims 1, 12 and 13 to specify patentably over Cramer among other things particularly that "...a software being run by the controller to manage/control the power adaptively by redistributing such power reactively or proactively according to a determined load ratio, or power usage proportion." Support appears in Specification page 13, lines 1-3; page 22, line 19 to page 23, line 10; and page 30, lines 6-21. Further to correct typographical error in the Specification, Applicant makes minor edits therein.

Respectfully submitted,

Dennis S. Fernandez
